## Experience

Rev.com; 2019-present

- Senior Software Engineer (IC3)
  - Designing and leading epics, providing technical feedback and help to teammates, remodeling parts of Rev's data models, continuously and efficiently delivering on complex issues. Working on mission-critical initiatives that significantly expand the features Rev offers to Enterprise customers
- Software Engineer II (IC2)
  - Specing and implementing technically challenging issues, mentoring junior teammates, giving technical feedback, leading epics. Helping lead initiatives that enable Rev's Enterprise customers to be more productive, more easily navigate the website, and collaborate with other users
- Software Engineer
  - Full-stack web application development with .NET framework, Microsoft SQL Server, and React with TypeScript

## Skills

C#	SQL	React	TypeScript	Git
Java	Python	HTML & CSS	Bash	RegEx

## Education

B.S. Computer Science, Duke University, Class of 2019

## Projects

Clouddit

- Web application visualizing popularity of words on media/discussion website Reddit built with Node.js, Vue.js, and D3 libraries. Allows users to interact with Reddit data to experience events, community tone, and content in a more meaningful way

LinguisticDB

- Full-stack project built with PostgreSQL, Node.js, and Vue.js. Analyzes linguistic properties of texts in Project Gutenberg's library, providing a new way to relate books and understand authors
