Experience

Truemed; 2025 - present
- Senior Software Engineer (IC4)

GitHub; 2022 - 2025
- Software Engineer III (IC3)
  - Constantly strengthening the identity experience at GitHub. Leading and contributing to new authentication and authorization flows within the github.com monolith, aiding service extraction efforts, and maintaining performance and stability

Rev.com; 2019 - 2022
- Senior Software Engineer (IC3)
  - Designing and leading epics, providing technical feedback and help to teammates, remodeling parts of Rev's data models, continuously and efficiently delivering on complex issues. Working on mission-critical initiatives that significantly expand the features Rev offers to Enterprise customers
- Software Engineer II (IC2)
- Software Engineer (IC1)

Skills

Ruby on Rails	SQL	React	TypeScript	Go	Git

Education

Duke University, B.S. Computer Science, Class of 2019

Projects

Clouddit
- Web application visualizing popularity of words on media/discussion website Reddit built with Node.js, Vue.js, and D3 libraries. Allows users to interact with Reddit data to experience events, community tone, and content in a more meaningful way

LinguisticDB
- Full-stack web built with PostgreSQL, Node.js, and Vue.js. Analyzes linguistic properties of texts in Project Gutenberg's library, providing a new way to relate books and understand authors
